

Accessories for slide stainers FS-9-25, FS-12-25, FS-16-COMBO, FS-16-HISTO for transportation, storage, and processing of preparations on slides (applicable for cervical screening)

Vertical rack insert for 20 slides (RI-20) (Fig 1) designated for placing slides with cell samples taken from the patient, for example, during cytological screening. The capacity of the RI-20 is 20 slides. For transportation of the RI-20 in the laboratory, the special protective containers are used (see Fig. 3-4):

- plastic suitcase for 10 pcs. RI-20 with a tray for accompanying documents (capacity of at least 200 A4 sheets);
- a box made of corrugated cardboard with ten sockets (for 10 RI-20 with slides);
- a box made of corrugated cardboard with five sockets (for 5 RI-20 with slides);
- a box made of corrugated cardboard with two sockets (for 2 RI-20 with slides).

The use of the insert-racks with special containers minimizes manipulations with slides and ensures the safety of preparations.

RH-20 racks-holders (Fig. 2) are used for processing preparations in automated slide stainers FS-12-25, FS-9-25, FS-16-COMBO, FS-16-HISTO.
